Maths Mastery Home Learning Challenge

Adult Guidance

What Are We Learning?

We are learning to say the number that is one more than a number.

How to Set up the Challenge

- Find a ball.
- Sit opposite each other, a short distance apart so that the ball can be rolled between you.

How to Get Your Child Thinking

- Can you say the number that is one more than my number?
- How do you know it is that number?
- Draw the numbers 0–10 in a line and ask questions, such as "Can you find the number 5 on the number line?" and "Where would I find the number than is one more than 5?"

Roll the Ball and Say One More

- Your partner can roll the ball to you and say a number.
- Can you catch the ball and say the number that is one more?
- As you roll the ball back, pick a different number to say.
- Can your partner say the number that is one more?
